Phone: +972-542454941

Email: ara123@gmail.com, birth date: 01.05.1978, married, address: 22 Hahula st. Ramat-Gan, IL.

Education:

2004-2006	Polytechnic University, NY (Israeli branch) M.S.M – Technology Management.
2001-2004	Champlain College, USA (Israeli branch) B.Sc. degree in Computer science.
1999-2001	ORT Syngalovski College, Tel-Aviv, Israel. Practical Engineer degree in Computers science.

Experience:

12/2007-11/2008	Architecture & Development leader, Yoomba (startup) Responsible for architecture (client/server), framework, tools and technology used. Recruited and managed team of developers. Examined new technologies and implementing them inside product by demand. Ongoing work with product and marketing management team in US branch. Technologies used: Server (JBoss, spring, hibernate, JSP, JMS, RESTfull web services, GWT, OpenFire...) client (90% GWT, 10% C++ wrapper)
5/2007-12/2007	Leading architecture & development, Koala Technologies,(startup) Managed team responsible for developing Gambling Platform. Defined and executed technical and functional requirements from vision to implementation and deployment, including Client/Server development, IT, infrastructure, provider selection and security oversight. The development was carried using: J2ee, Java 5, JSF, Spring, Hibernate, Flash, Ajax, DHML on JBOSS and SQL Server 2005.
1/2005-5/2007	J2EE Team Leader, I.D.I. Technologies Ltd. Team leader of java developers working on customization of core application (Direct insurance companies management) for various IDIT's customers all over Europe. Deeply involved in infrastructure and framework development. Main technologies used: J2EE, EJB, Struts, JSP, JSPTags, Quartz, IDIT FW running on Weblogic & Websphere.
2002-2005	J2EE developer , "Mamram" (the I.D.F Computer Centre) Leading migration process of Army's accounting system to innovative J2EE based application. Led the development process and deeply involved in analysis, architecture and quality control of J2EE applications. Instructing and training developers. The development was carried out with J2EE, BC4J, Servlets, JSP, Ajax.

2000-2002	Developer, New Micro Computing
	Developed and designed financial systems (tax calculation mostly). Implemented algorithms based on laws/legal definitions. Visual Studio as main IDE. Applications had an interfaced to government information systems (IRS/Social Security etc.)
1997-2000	Developer, Ray-Ram Computers
	Developed variety of client/server applications for medium businesses (Orders/Accounting/Stock – VB/DELPHI).

Experience/Knowledge	
JAVA+ related	Java, GWT 1.5, Spring, Hibernate, JSP, Servlets, JSF, Struts, JMS, XML, XSLT, XPath, JAXB, JPSTags, OOP, AOP (aspectJ), EJB, BC4J, JDBC, AJAX, DWR, JGroups, RMI, Quartz, XMPP, etc...
App./Web Servers	Jboss, WebLogic, Tomcat, Apache, Jetty, IIS, Websphere, Oracle.
TOOLS	SubVersion (+mng.), Cruise Control, Jira, BugZilla, StarTeam, QC, Ant, Maven2
DataBases	Oracle 9/10(+mng.), MS SQL 2005(+mng.), Sybase(+mng.), MySql, HSQLDB
OS	Windows, Linux, Solaris, Unix, VMS
IDE	Eclipse/MyEclipse, ItelliJ, NetBeans
